

ManageMyHealth™

# Clinical and Patient Portal

## Enhancing Patient Care

A secure online health solution that extends the capabilities of your practice and is of real benefit to your patients

# Connecting clinicians with patients online to enhance practice efficiency and effectiveness

-  Strengthens general practice/patient relationship
-  Significantly reduces administrative time
-  Reduces communication costs through electronic recalls, lab results and secure email
-  Enhances customer service and patient safety through patient self service
-  Generates additional revenue e.g. secure online consultations
-  Improves quality of health information available to patients
-  Enables general practice to share patient medical information with after hours, emergency and other primary care clinicians

## Patient Services

-  Access and maintain medical records
-  Book appointments with doctor/nurse
-  Request repeat prescriptions
-  View lab results
-  Secure communications with a health professional
-  Manage health goals, set up tasks and track results
-  Access health content
-  Receive recall and appointment reminders - managed in a health calendar
-  Provide selected information access to specialists, community health workers and family
-  Monitor patients' health remotely

## Key Features

-  Patient-centric platform
-  Integrated with Medtech32™, Medtech Evolution and Evolution Specialist
-  Service Oriented Architecture (SOA) - supports web services, XML and HL7 standards
-  Based on latest Microsoft® technologies and Web 2.0 internet technology
-   
**Microsoft**  
GOLD CERTIFIED
