Clinical Software with
HIC On-Line (release 3.0)
capability.**

Medical Windows Integrated

Clinical is a fully featured

Practice Management

Package. It is based on a

premium quality and

proven platform.

Features of New Version 7

General Features

- Quick to use - Function Keys and Keyboard shortcuts.
- Easy to use interface with clean uncluttered design.
- Patient Register tracks Recalls, Messages, Referrals, Insurance Claims & more.
- Comprehensive Transaction History.

Reception and Appointment Book

- Patient Information/ Demographics/ File- The most comprehensive patient data file on the market that is fast and easy to use.
- Appointment Book - True rich client Windows interface. Medwin has multiple diary view/ configuration options and styles of diary, including List and Chart, List, and 'Book Look'. With full colour coding, notes and a wide range of configuration options
- Waiting Room that is easy to use, with only one click to enter patient clinical record. Single and multiple practitioner views
- Standby Appointments - Comprehensive Standby and Cancellation functionality significantly reduces the incidence of DNA's and therefore improves practice productivity
- Patient Contact Register- Comprehensive Patient Contact Manager is unique to Medwin and tracks all events for a patient. All relevant patient information, including letters, appointments, insurance letters, referrals, recalls are able to be retrieved in one easy to use screen.

- Theatre List and Surgical Audit
- Appointment Reminders
- Messaging - send text messages to any user on the system

Accounts and Business Management

- Billing and Invoicing
 - Lightening fast billing and invoicing capability which can be activated with function key (CTRL-A) or Right-Click on patient name.

More billing options than any other package, including:

- Gap cover billing
- Quotations
- Anaesthetic RVG billing
- Dental billing - incl. payment installment plans
- Insurance billing
- On Hold accounts
- Bulk Billing and Patient Claims
 - MedClaims - Full MedClaims capability for all HIC related claims
- Receipting - Function key and mouse access to Receipting makes for fast access and processing. The system adds payment details to the receipt to minimize typing. Additional features include Split Payment options, AutoPay, and the Post Button for committing payments takes the worry of mistakes away.
- Banking - State of the art banking capability which includes separate bank accounts, preview function, complete banking history and un-allocated payments capability.

- Security - Multi-level security functionality with a comprehensive range of controls over user access to important information & functionality.
- Links and /or Exports to other financial/business software - Ability to link to financial and general business software to take full advantage of all Medwin information. Medwin is compatible with MYOB (v10 or higher), QuickBooks Pro (v7 or higher), MS Excel and SUN Accounting.

Documents and Records Management

- Integrates fully to MS Word, easy to use templates, mail merge.
- Pathology and Diagnostic image import (attached to patient file)
- Scanning of Documents and Images (attached to patient file)
- X-Ray and Image Management (X-ray, CT Scan, Ultrasound, MRI)

Reporting and Data Analysis

- Audit Trail
- Detailed and Summary Reports
- Patient Treatment Outcomes
- Financial Reports
- Patient Management Reporting
- HIC Compliance Reporting
- Referrer Analysis
- Export to MS Excel
