

medtech **EVOLUTION SPECIALIST**

Integrated, Intelligent and Customised

Medtech Evolution Specialist is amongst the most advanced health specialist management systems available today. It focuses on improving the quality and efficiency of healthcare service delivery by providing user friendly tools and functionality to help medical specialists deliver the highest quality of care.

Medtech Evolution Specialist is a fully integrated appointment, billing and clinical management solution designed specifically for specialists. It is flexible and adaptable for the evolving needs of today's medical specialist.

Specialised Modules

Medtech Evolution Specialist is a highly modular application where clinicians can select the required functionality for their practice. The customisable Patient Palette ensures that only relevant information is displayed from within each module.

Demographics

Records containing extensive information on patient demographics provide the platform for comprehensive and automatically generated reports. All of the information required by practices for patient consent and status are also captured.

Appointments

Clinical professionals are provided with the flexibility to cater for emergency, regular or reoccurring appointments as well as waiting list functionality. Utilising a full range of appointment scheduling, front desk users can schedule procedures, consultations, pre-operative, post-operative and follow up for multiple providers, using multiple appointment views (day, week, month).

Venue, Room and Resource Management

Management of Venues, Rooms and Resources enables schedulers to readily assign multidisciplinary teams with equipment, venues and rooms for a particular procedure or consultation.

Equipment Hireage

Administrators are able to readily manage equipment rental by linking it to patient information, bond, hireage and refund information.

Theatre Lists

Clinicians are able to prepare customisable, comprehensive theatre lists which outline the surgical activities over time including - hospital, patient, personnel, equipment and notes. These reports underpin theatre, personnel and equipment scheduling as well as theatre preparation.

“Medtech Evolution Specialist is powerful, integrated and streamlined.”

Accounts

Comprehensive accounting functions including bulk bill invoicing for agencies and insurers, bespoke payment plans, invoicing and payments. In addition to this, the functionality enables customisable and standardised reporting.

Quotation and Estimation

Production and management of quotes and estimates incorporating provider and patient details, procedure and treatment, code, pre-op diagnosis, fund details, assistant fees and hospital charges. On acceptance the quotes and estimates are readily integrated into the billing modules.

Clinical Records

Medtech Evolution Specialist provides a complete audit trail covering medications, disease management and coding. Clinicians can enter all information into the consolidated all encounters consultation section either directly, or by using voice recognition or dictation functionality.

Access to patient records and documentation is managed by role based security permissions.

Recalls and Screening

Medtech Evolution Specialist enables the generation of screening and recall templates. This functionality also provides the ability to document patient measurements, and graphs trends over time.

Prescribing

The prescribing module features an integrated formulary, providing comprehensive information on drug interactions and pharmaceutical funding. This formulary is either updated monthly electronically or by disc.

Treatment Plan/ Procedure Templates

Clinicians are able to create a number of customised treatment or procedure templates to support streamlined service delivery.

Multimedia Capability

A number of anatomical templates are provided where clinicians can record patient notes and related drawings. In addition to this, any multimedia digital images can be stored within this module for future reference.

Electronic Patient Connectivity

The Medtech Evolution Specialist product has the ability to interface with a feature rich patient health and wellness portal, which enables the provider to interact with the patient electronically.

Used in conjunction with

ManageMyHeath™, the clinical and patient portal will establish a valuable and secure electronic relationship between the specialist clinician, general practitioner and patient.

Integrated, Intelligent and Customised

Medtech Evolution Specialist Services

Support Services

Medtech Evolution Specialist has an expert team of customer support service personnel to quickly and efficiently deal with queries. In addition, customers are able to access an online library of support through Medtech Online.

We also have a dedicated team of account managers who regularly meet with clients and are invaluable in helping to optimise the use of Medtech Evolution Specialist within the practice.

Onsite & In-house Training

Medtech can provide customised and personalised training with a dedicated team of training and Support Consultants, whose collective experience covers all facets within the health sector.
