## Version 19.4 (Build 2990) and Subsidy Adjustment Update

Medtech Ltd is pleased to advise the following two updates are available for General Release and can be downloaded along with the release notes from [www.medtechglobal.com](http://www.medtechglobal.com). Region: New Zealand ▶ Medtech Online ▶ Medtech32. **The release notes contain important information on how to adjust any invoice differences.**

We appreciate this has been a stressful time for all and therefore to assist those practices who have yet to upgrade their systems with the new subsidy GST rates, as part of this update, all finalised and un-finalised claims will have the new GST rate applied from the period 1<sup>st</sup> October 2010 to the date you run the update.

- **Version 19.4 (Build 2990) Update**

This update includes the following:

- Subsidy Adjustment which corrects any anomalies in subsidies from 1<sup>st</sup> October 2010, including claims invoiced with the old GST rate.
- Konnect Suremed Inbox subject heading fix.
- Clinical Event Export which assists with the mapping options

- **Subsidy Adjustment Update**

Subsidy Adjustment which corrects any anomalies in subsidies from 1<sup>st</sup> October 2010, including claims invoiced with the old GST rate.

## Important Information

### You will only need to run one of these updates

Please follow the criteria below to determine which update you need to run.

- If you **ARE ON** Medtech32 Version 19.2 Build 2975 or higher, please download and run the **Version 19.4 Build 2990 Update**. This update **MUST** be run on the Medtech32 Server and all users **MUST** be logged out of Medtech32. **The Scheduler MUST to be turned off.**
- If you are **BELOW** Medtech32 Version 19.2 Build 2975 you **CAN** only run the **Subsidy Adjustment Update**. This update **MUST** be run on the Medtech32 Server and all users **MUST** be logged out of Medtech32.

**Please note that this update may take considerably longer to install compared to other Medtech32 updates due to the large volume of SQL's being run on the database. Those practices with a large number of financial transactions in the database will be most affected by this.**
