

Release Notes

Medtech32

Version 19.14 Build 3408 Update (November 2011)

IMPORTANT NOTE

Medtech recommends that all Medtech upgrades and database back-up and restore processes are performed by a **Medtech Certified Technician** or your Practice Technician. For a list of Medtech Certified technicians please visit the Medtech Global Website: www.medtechglobal.com

These Release Notes contain important information for all Medtech Users. Please ensure that they are circulated amongst all your staff. We suggest that these notes are filed safely for future reference.

Issues Resolved in this Update

1. Prescribing Assistant

This update resolves issues encountered with the appending of Classification records when using the Prescribing Assistant.

2. Patient Inbox

This update resolves the issue of not being able to bring the Patient Inbox screen to the front of other windows when using the Provider Inbox Toolbar Icon, Menu or Shortcut.

3. NIR Message Transfer

This update ensures when using the Update function on Vaccine Update Messages, that the vaccines are being appended for the patient correctly.

4. Patient File Transfer

This update ensures that large messages for patient being imported into Medtech do not show the RFT formatting tags and become unreadable for the receiving Provider.

5. Appointment Pad Performance

This update resolves issues experienced with the performance of the Appointment Pad module.

For further information on these new features, or any other queries regarding Version 19.14 Update, please contact Medtech Support on 0800 2 MEDTECH (633 832) - Option 1 or send us a fax, toll free on 0800 MEDTECH (633 832) or email: support@medtechglobal.com.
