

medtech **EVOLUTION**

Make the Switch to Evolution

Evolution was created by rethinking the entire PMS and user experience. In many ways it's a new beginning.

Effortless Transition

We wanted to take an experience that people already knew well and enhance it, to make it more useful and enjoyable. It is instantly familiar to existing Medtech32 users as it inherits previous modules and keyboard shortcuts.

Enhanced User Experience

Evolution utilises a new user friendly interface, similar to Microsoft Office. It offers highly configurable and prearranged dashboards, workspaces and widgets to view everything you need. Context driven functions to help you focus on what is most important, your patient.

Platform for the future

State of the art performance using 64-bit architecture, .Net framework and Microsoft SQL database. Evolution helps you stay connected and productive wherever you are. You have a range of deployment options including a fully hosted cloud solution.

Know Your Data

Evolution provides powerful clinical and financial analysis to increase insights from your data. Comprehensive data filtering options provides real time, fast and efficient analysis of patient data, allowing you to measure and improve your practice's performance.

Frequently Asked Questions

How do I switch to Evolution?

You can switch to Evolution from any PMS effortlessly in a phased manner.

What happens to all the data in my existing PMS?

We support 100% data migration from MT32. We have a systematic approach to achieve this.

If you use a different PMS, we target 100% data migration by applying our expertise in data mapping and conversion.

How much training is required to adapt to Evolution?

Evolution requires minimal training if you are an existing MT32 user.

If you are switching from a different PMS, a simple and customisable training program is available.

Extended training/follow-up sessions are available in the form of online e-Learning courses.

Will Evolution run on my current Practice computers?

With technological advancements packed into Evolution, it requires that a minimum set of Hardware and Software requirements be satisfied. Please contact us for specifications.

If I do not want to invest in new Hardware, can I still switch to Evolution?

Yes, you can still switch to Evolution.

We offer Medtech Cloud services which offer state-of-the-art facilities to host your data.

Safety and security of your data are given paramount importance in Medtech Cloud.

How do I get in touch if I want to switch to Evolution?
